A cloud of benefits!

+ Hiboutik is free

Hiboutik is completely free for all operational features (sales, customers, products, inventory...) including the end-of-day report (Z report). It is the most complete POS solution to manage a business properly and cost-effective. You can access your data at any time, from anywhere.

+ Hiboutik is comprehensive

A short form to fulfill and you can run your store with Hiboutik. With a user friendly layout, it is really intuitive to use. Add your products in minutes and proceed immediately your first sales. If you need support, a complete and teaching online help, answers to all your questions on how to use Hiboutik POS software.

+ Hiboutik is scalable

Made by shopkeepers, the sale screen is ergonomic to reduce checkout times. With an advanced permissions management, you can display on your cash register only the suitable features. Hiboutik is responsive, you can use it on a smartphone or your desktop with keyboard and mouse.

+ Hiboutik is easy to setup

No software to install. All is running online. Updates are free forever and available immediately on all accounts. As a user you always get benefits from our latest updates and new features. For multi-stores businesses, you can access easily to all your locations data from a single account.

HIBOUTIK

- + Free
- + Easy to use
- + Complete
- + Ergonomic
- + Secure
- + Multi-devices

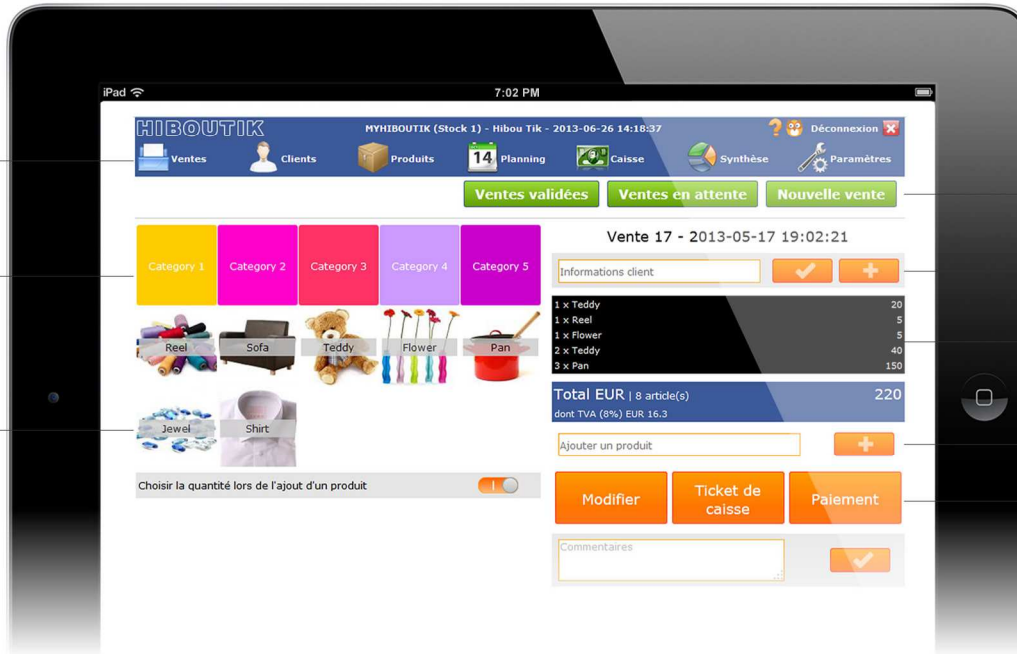

Hiboutik works from any device connected to the Internet. Wherever you are, whenever you want, you can consult your daily turnover and register information. Most POS peripherals (receipt printers, barcode scanners...) are compatible.

An easy to use and scalable solution!

Different tabs of an account

Product categories

Product quick keys

New sale and parked tickets

Link the sale to a customer

Sale details

Add products by barcodes

Print receipts and proceed payments

✓ Setup some powerful features

According to your business sector, some specific features are available. The restaurant module allows setting table and room layouts, selecting cooking options and modifiers, printing orders to the kitchen and managing kitchen delivery process. You can save all your events in an advanced schedule and link them directly to your sales and customer database.

✓ Perform your sales with ease

The sale interface is easy to use to increase your checkout efficiency. To add a product to a sale, you can scan it or use quick keys organised into categories. You can customize your account by displaying prices excluding or including VAT, managing different sales tax rates, discount prices, happy hour events... You can customize your receipts, select different printing methods (without price, on standard or small paper rolls, digital receipt...) and print invoices. Hiboutik also manages mix-payments and deferred settlements.

✓ Manage your products in detail

The product management is very complete: track or not your product into inventory, manage product variants and different pricing policies, create barcodes automatically, fulfill discount prices, setup inventory warnings, proceed to stock-takes, assign tags to products, track serial numbers...

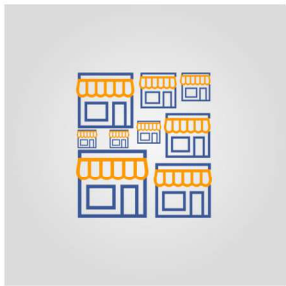

✓ Boost your customer database

If you register your customer information and assign them to your sales, you can print invoices, manage a loyalty program, propose store credit and build customer relationship management campaigns. You can sort out your customer database with multi-criteria to conduct cross-selling and marketing operations.

An affordable all-inclusive software !

✓ Track your business

An option at 9.90 eur/month provides a host of charts and reports to help you better track your business. Statistics on your sales, margins, volumes, customers, users...are key information to monitor and optimize your point of sale. You can find all the data you need, at any level of detail, to make the right decisions. Even your accountant will be delighted with the monthly accounting report and the inventory situation.

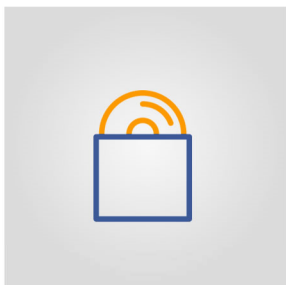

✓ Group your stores

An option at 9.90 eur/month/store helps you to manage all your shops with the same account. The main features are: manage your products in a unique database, generate transfers between your stores, resupply your outlets from different warehouses, share your customers database and your loyalty program with all your locations, ...

✓ Use cost effective hardware

Hiboutik works on any device with a web-browser (PC, Mac, Ipad, tablet, smartphone...). You don't have to buy any specific hardware, you can work the way you want on the equipment you may already own. Most POS hardware (receipt printers, barcode scanners...) are compatible and easy to setup.

✓ Secure your data

Your data are stored on secure servers and daily backups are performed. You can login your account only with an encrypted connection. You can manage rights and restrictions for each user of your account, to control access to your sensitive information.
